**Full Stack Developer** - Dedicated Full Stack Developer with experience in building responsive web applications and creating user-focused interfaces. Strong in both front-end and back-end development, with a passion for learning and applying new technologies. I am skilled at collaborating with teams to deliver high-quality, efficient, and scalable software solutions.

## Experience

2024 – PRESENT

### Software Developer | CapaCiti

Designed and developed interactive websites and applications using React, JavaScript, HTML, and CSS. • Integrated RESTful APIs to enhance application functionality and data interaction. • Collaborated with clients to understand project requirements and deliver solutions tailored to their needs. • Ensured responsive design across different devices, focusing on performance optimization.

SEPTEMBER 2023 – JUNE 2024

### IT Infrastructure | RTMC

Assisted in maintaining and optimizing the organization's IT infrastructure. • Conducted system diagnostics and troubleshooting to ensure smooth operations of IT systems. • Provided technical support to employees by resolving hardware, software, and network issues. • Participated in the installation and configuration of network devices, servers, and workstations

## Skills
